Dear Sir or Madam

Please let me introduce myself, my name is Sandra Strang and I am working as a program manager for the RWTH International Academy. As one of the leading engineering universities in Israel, I would like to inform you about our new Dual Post-Graduate Study Program “German Engineering”. By combining theoretical knowledge with an internship in a German company, the program offers a deep insight into German Engineering. It is designed for Master students and graduates in engineering. Bachelor students in their last year of studies are also encouraged to apply. This year, special focus lies on the Arab region, therefore we would be happy to win your university as a partner for the program.

Key facts:
- 6-month full-time program, start in November 2016
- Student application process in June 2016
- Taught completely in English
- ECTS Credits: 30
- Exclusive courses at RWTH Aachen University
- The program includes an internship of 4½ month in a German company or institution
- Career development service
- Funded by the State Government of North-Rhine Westphalia
- Tuition fees of 3,100 EUR

With its 260 institutes in nine faculties, RWTH Aachen University is among the leading European scientific and research institutions. National rankings and international assessments attest to the RWTH graduates marked ability to handle complex tasks, to solve problems constructively in team work and to take on leadership roles. It is therefore not surprising that many board members of German corporate groups studied at RWTH Aachen. We would be very content if you promote our program to your students, interested in Germany. Please find attached our information flyer.

Further information are also available on our website:

and on Facebook:

If you have any further questions, please do not hesitate to contact me.

Kind regards from Germany

Mrs. Sandra Strang
