Title: Required doctorate and postdoctoral researchers for the Games of Foods EU project

We are seeking for leading doctorate and postdoctoral researchers for the Games of Foods project, funded by the EU commission. The project involves collaboration with researchers from the UK, Belgium, Finland, and Poland. The project seeks to increase knowledge and awareness of balanced nutrition and a healthy lifestyle through the design and application of escape games. Candidates are expected to speak, read, and write English fluently. They are expected to work both independently and collaboratively with international partners.

Candidates are welcome to contact:
